

LIVIA LABORATOIRE D'IMAGERIE, DE VISION ET D'INTELLIGENCE ARTIFICIELLE **ÉTS**

Research Axes

- machine learning
- computer vision: perception in 2D and 3D scenes
- pattern recognition in static and dynamically-changing environments
- information fusion
- optimization of complex systems
- $O(\log N)$ image indexing - big data

LIVIA LABORATOIRE D'IMAGERIE, DE VISION ET D'INTELLIGENCE ARTIFICIELLE **ÉTS**

Application Domains

- analysis of medical, aerial and satellite images
- video analytics and surveillance
- biometrics (face, voice and signature)
- document analysis
- affective computing in healthcare

LIVIA LABORATOIRE D'IMAGERIE, DE VISION ET D'INTELLIGENCE ARTIFICIELLE **ÉTS**

Members and Expertise (1/2)

1. **Ben Ayed, Ismail:** Computer Vision; Machine Learning and Pattern Recognition, Combinatorial Optimization, Convex Optimization, Medical Image Analysis, Information Theory
2. **Dolz, Jose:** Medical Image Segmentation, Deep Learning, Optimization
3. **Duchaine, Vincent:** Robotics, Mechatronics, Physical Human-Robot interaction, Haptics, Tactile Sensing, Nonlinear and Impedance control
4. **Cardinal, Patrick:** Affective Computing, Deep Learning, Speech Recognition, Information Extraction from Speech, Parallel Computing
5. **Desrosiers, Christian:** Data Mining; Medical Imaging; Collaborative Recommendation Systems; Network Analysis; Business Intelligence, Combinatorial Optimization
6. **Granger, Eric:** Machine Learning, Pattern Recognition, Computer Vision, Information Fusion, Adaptive and Intelligent Systems, Video Surveillance, Biometrics, Affective Computing

LIVIA LABORATOIRE D'IMAGERIE, DE VISION ET D'INTELLIGENCE ARTIFICIELLE **ÉTS**

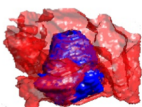

Members and Expertise (2/2)

7. **Koerich, Alessandro:** Computer Vision; Machine Learning; Music Information Retrieval; Big Data Analytics; Affective Computing
8. **Pedersoli, Marco:** Visual Object Class Detection Classification and Pose Estimation, Weakly- and Semi-Supervised Learning, Convolutional and Recurrent Neural Networks
9. **Sabourin, Robert:** Document and Signature Analysis; Pattern Recognition and Learning; Information Fusion; Evolutionary Algorithms
10. **Toews, Matthew:** Medical Image Analysis; Computer Vision; Machine Learning
11. **Wong, Tony:** Industrial Engineering; Chance-Constrained and Multi-Objective Evolutionary Optimization; Data Envelopment Analysis; Statistical Ranking and Selection

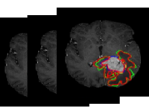

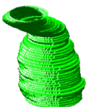

LIVIA LABORATOIRE D'IMAGERIE, DE VISION ET D'INTELLIGENCE ARTIFICIELLE **ÉTS**

Image segmentation

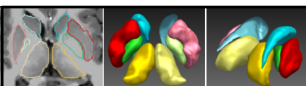

LIVIA LABORATOIRE D'IMAGERIE, DE VISION ET D'INTELLIGENCE ARTIFICIELLE **ÉTS**

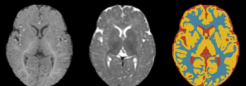

Brain tumours

Incidental findings (vascular structures)

Subcortical structures

Brain tissue

Deep semi-dense and multi-scale FCNN

LiviaNET (early fusion)

<https://github.com/iosedolz/LiviaNET>

Subcortical structures and brain tissue in MRI

Multi-modal learning

HyperDenseNet

<https://github.com/iosedolz/HyperDenseNet>

Weakly supervised learning

Reduce the cost of manual annotations

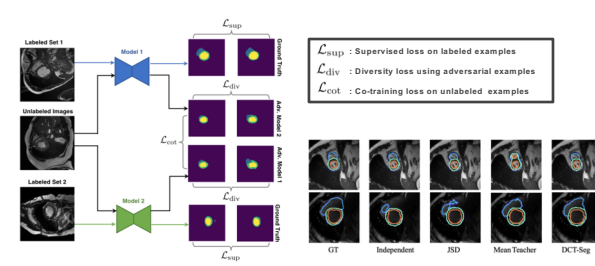

Additional information

https://github.com/LIVIAETS/SizeLoss_WSS

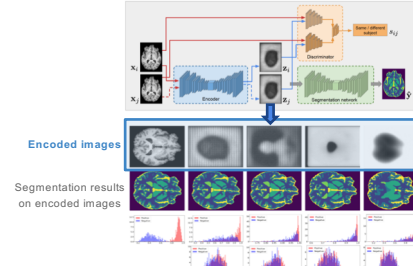

Semi-supervised learning

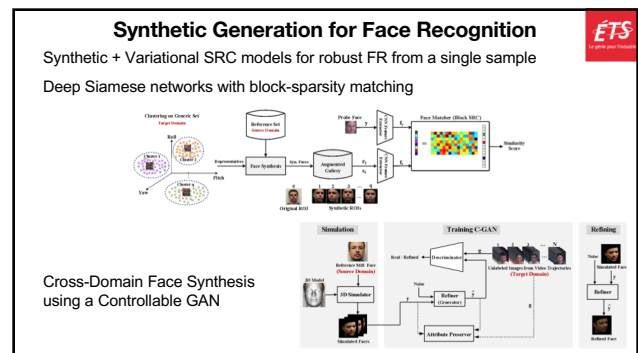

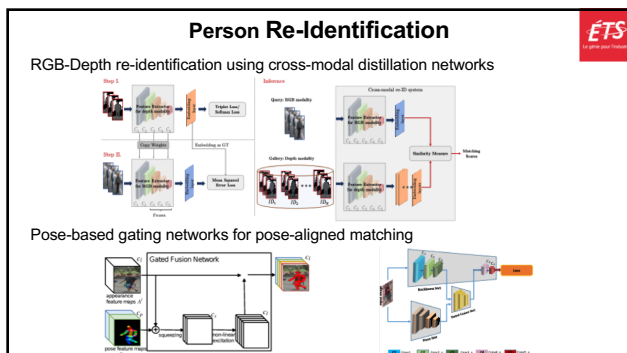

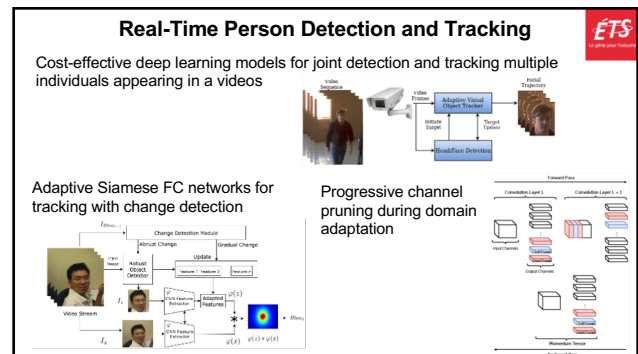

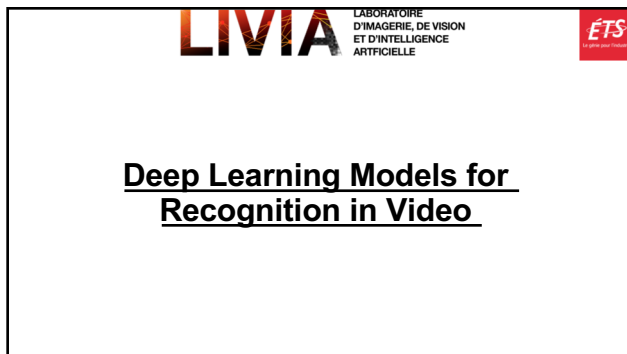

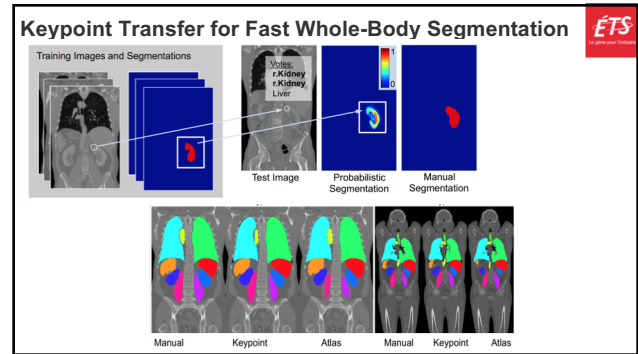

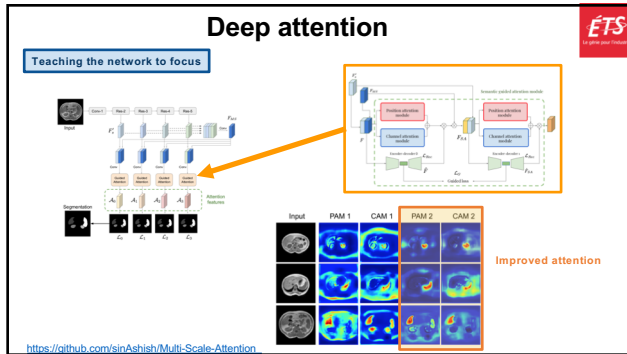

Co-training multiple CNNs

Privacy preserving

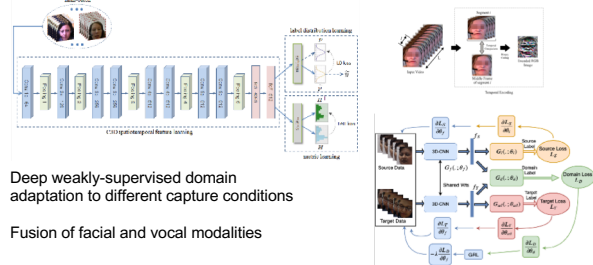

Avoid leakage of sensitive information

Affective Computing

DL models for spatio-temporal recognition of pain, stress, depression, fatigue, engagement, etc. for health care, e-learning and gaming

Deep weakly-supervised domain adaptation to different capture conditions

Fusion of facial and vocal modalities

LIVIA

LABORATOIRE
D'IMAGERIE, DE VISION
ET D'INTELLIGENCE
ARTIFICIELLE

Medical Image Technology

Computer Aided Diagnosis

Deep weakly supervised learning techniques for classification and localization base on histology images with global annotations

Leverage the large quantity of weakly-labelled or unlabelled images

Image-Guided NeuroSurgery

Phantomless Auto-Calibration and Online Calibration Assessment for a Tracked Freehand 2D Ultrasound Probe

A Feature-Driven Active Framework for Ultrasound-Based Brain Shift Compensation

Hybrid MRI-Ultrasound Acquisitions, and Scannerless Real-Time Imaging

Keypoint Signatures – $O(\log N)$ Medical Image Analysis

"Neuroimage signature from salient keypoints is highly specific to individuals and shared by close relatives"
NeuroImage 2020
